

To Whom It May Concern:

Please allow this letter to serve as **high recommendation** of Selina Bell. I have had the pleasure of working with and teaching alongside of Mrs. Bell at H. V. Jenkins High School, a 1,200 student urban high school in Savannah, Georgia. In addition to our teaching duties, Mrs. Bell and I coordinated several large projects together, including Georgia Department of Education STEM Certification, Industry Certification for Engineering, and Citizen Science in conjunction with the University of Georgia. Our collaboration did not conclude at the end of the school day. We co-chaired Technology Student Association (TSA), our CTSO, ensuring participation at every level of TSA available in Georgia.

As Mrs. Bell was a new teacher to H. V. Jenkins High, I had the opportunity to be her faculty support person. It became clear to me very quickly that Mrs. Bell had an enormous rapport and affinity for students of all backgrounds and challenges. She conveyed her knowledge of the subject area, continuing to learn and grow within her content, and simultaneously imparted to students their worth and capacity. She developed community connections that she passed on to her students, taking them on many unique field trips including Hatch Nuclear Power Plant, Georgia Power and Pike Industrial, and Savannah Technical College Solar program. Mrs. Bell was especially supportive of female students in her program and we worked together to recruit and retain female students for energy and engineering.

Mrs. Bell sought out additional training, and endeavoured to offer in field certification examinations within the CTAE department that would allow students to exit the program "work world ready." She focuses on soft skill acquisition and training, and supports economic development efforts in our region. Mrs. Bell is not only a dedicated teacher, she constantly works to become the best person she can be to model strength and caring to any student she comes in contact with.

I am pleased to offer my strong recommendation of Mrs. Selina Bell. She is making the world a better place, one student at a time.

Sincerely,

Carolyn Perry, Ed. D
Engineering Teacher
